

Editorial Note

Technology & Industry Letters: Special Focus on China

Jianping Du

Guest Editor, IJSSST

Zhengzhou University of Technology, Henan, China

hunter2199@163.com

It is my privilege to be an Invited Guest Editor for this issue of the International Journal of Simulation: Systems, Science and Technology (IJSSST). In this issue we selected 35 papers to represent a cross-section of research in engineering technologies and applied sciences areas. The selected papers have gone through a strict review and revision stages after extending the contents. In my role as Guest editor for this issue, I have full responsibility for maintaining the quality of the selected articles to the highest international standard in published Letters. I am grateful for IJSSST to give me the opportunity to develop and publish this set of papers as a special outsourced issue. This editorial note also indemnifies the IJSSST from any responsibility for the content and presentation of this issue. We wish to thank all our reviewers and the editorial board members who have contributed to the release of this issue by their devoted engagement and dedication. We here with also wish the readers of the journal to enjoy reading these papers as much as we enjoyed reviewing and editing this issue.
